THE ROSLYN WRECK

Brave Hearts and Willing Hands in the Work of Rescue.

FIVE ADDITIONAL BODIES RECOVERED.

Another Explosion Liable to Take Place at Any Moment—The Work of Relieving the Bereaved and Distressing—The Funerals.

ROSLYN, Wash., May 12.—The work of bringing out the bodies of those killed in Tuesday's disaster is being carried on day and night as fast as brave hearts and willing hands can accomplish it. Five more bodies were taken out at 3:30 this morning. The rescuers have been working incessantly for the past forty-eight hours and are worn out, but they cannot be persuaded to cease work until all the bodies of their friends and fellow workmen have been recovered.

The bodies have been recovered in vast clouds at the bottom of the slope owing to fresh air being driven in and driving the gas before it. It would not be at all surprising should another explosion take place at any moment. It is thought by experienced men that if another explosion does occur the slope will be badly damaged and the reaching of the other bodies rendered impossible for perhaps weeks.

The managers of the mine think that if nothing intervenes the bodies will be secured by midnight.

At a meeting of citizens last night a finance committee was appointed to receive funds that are beginning to come in from all quarters. It is thought that the relief fund was rightly apportioned to the widows and orphans in need. A committee was also appointed to take the arrangements for the burial of the dead.

Today at 10 a. m., the bodies of twelve of the victims were interred, the funeral cortege starting from City hall, where the service was preached over the bodies of the dead men.

The funeral procession was a large one. The Knights of Pythias, I. O. O. F., I. O. G. T., and the Masons, dressed in full regalia, were in attendance. Mine Inspector Edmunds of this district is in the mine at present investigating.

All precautions are being taken by the coal company to relieve the coal mine and prevent further accident and to effect an entrance to the bodies of the dead miners with all possible haste without endangering the lives of the relief squads.

Another Deluge at Kansas City.

KANSAS CITY, Mo., May 13.—Another heavy rain set in about 8 o'clock last night and in addition to this the rivers are rising and sending a flood down.

The Kawk sawed with an immense volume of water and has now overflowed its banks and is running three feet deep in the streets of the Kansas City packing house. The King & Co.'s packing house has three feet of water in the basement and work has been suspended. The Fowler packing house is also in trouble and the hogs are swimming around in the yards, as the water came up so suddenly that it was impossible to get them out in time.

The floods of water which are at this moment pouring from the clouds will probably send the Missouri above the dikes and submerge Harlem if this village is not already under water. The danger line has been passed, and all the houses in Armourdale and Argentine will be deserted at once by the people. Reports from Kansas are meager but the signal service officers say that the present rain is falling in Kansas as well as western Missouri.

The Danger Line Passed.

KANSAS CITY, Mo., May 13.—The danger line has been passed and the flood is increasing every minute. The Missouri river is now a raging torrent and the town of Harlem is being covered.

The signal office sent a warning message to the people of the city, telling the inhabitants to get out as quickly as possible and the exodus began at once.

Water is now lying all over the low lands as the river and the bottom are covered by the back water which has come in behind the dikes of the railroads. All the low-lying parts of Kansas City, Kan., are now under water.

The houses in Armourdale and Argentine were taken from their houses in boats while several were compelled to wade through water up to their waists.

Another Dynamite Explosion.

VIENNA, May 13.—Construction was cut, Wednesday evening in Budapest by the explosion of a dynamite cartridge beneath an electric tram car.

The car was full of passengers and the dynamite cartridge exploded with a deafening report, shattering a wheel and overturning the car. When the passengers jumped over their heads, no one being seriously hurt, it was discovered that seven more cartridges lay alongside the track, which fortunately had not exploded.

Students of the University of Hungary, the authorities of Hungary, and the police are now dealing with the situation in Vienna and Berlin.

Now, however, there is a general determination to institute measures for the suppression of anarchy.

Compelled to Avoid High Altitude.

COLORADO SPRINGS, Colo., May 13.—Children yesterday decided not to make the proposed trip up Pike's Peak that they were to make on the 15th.

The children of the city were also told the proposed trip up Pike's Peak that they were to make on the 15th.

Boiler Explosion.

Several Men Killed and Many More Injured.

AND BURIED BENEATH THE WRECKAGE.

Destruction of the Midland Lumber Co.'s Mill—Sixty Men Employed and But Few of Them Accounted For.

MIDLAND, Mich., May 12.—The boiler in the mill of the Midland Lumber Co. exploded this afternoon. Charles Allen and Engineer Van Alkenburg have been taken from the ruins dead, and many are buried beneath the debris. Several of the injured have responded to their homes. The mill is a complete wreck. About sixty men were employed in and about the mill, and at this hour but few of those who were in the mill have been accounted for.

LATER.

The latest accounts from Midland place the number of killed at four. Four were fatally wounded, and from sixteen to twenty others are more or less seriously injured. The ruins are still being searched. The cause of the explosion is alleged to be due to defective boilers. The list of killed as far as known is John Allen, Eugene Van Alkenburg, Judge Malcolm, Dick Stearns. Two of the victims were blown clear over the mill.
